Education

University of North Texas

Bachelor of Science in Computer Science, Honors College

Denton, TX

Expected: Dec 2027

Skills

Programming: C/C++, Python, JavaScript, TypeScript, Tailwind CSS, Flutter

Frameworks/Libraries: React, Node.js, Express.js, Vite, Framer Motion

Databases: MongoDB, VectorDB, SQL

Tools & Technologies: Docker, Git, GitHub, REST APIs, NumPy, Pandas

Soft Skills: Data Cleaning, Data Analysis, Data Modeling, Problem-Solving, Critical Thinking, Communication, Teamwork

Experience

IT Support

May 2025 – Present

University of North Texas

Denton, TX

- Provided IT support for housing and dining, including troubleshooting technical issues and performing remote support through ScreenConnect; logged incidents in ServiceNow.
- Utilized command-line tools and system diagnostics on Windows and Linux environments to resolve complex technical problems.

Undergraduate Research Assistant

October 2025 – Present

University of North Texas

Denton, TX

- Cleaned, pre-processed, and transformed raw tracking data under the supervision of Prof. Heng Fan to produce usable datasets for visual-tracking experiments and analysis.
- Developed and applied mathematical models and foundational calculations to support the video-based tracking research project.

Projects

StudyPal | *React, TypeScript, Tailwind CSS, PostgreSQL, Hono, OpenRouter APIs, Cloudflare*

- Developed a full stack AI powered study platform featuring active recall flashcards, intelligent note taking and adaptive quizzes to enhance learning outcomes.
- Integrated time-based study sessions with spaced repetition algorithms to promote focused learning and long-term retention.

Personal Portfolio Website | *React, JavaScript, HTML, CSS*

- Developed a fully responsive personal portfolio with animated UI/UX powered by Framer Motion.
- Strengthened understanding of web development, server integration, and APIs.
- Gained experience in full-stack development, web services, and front-end frameworks, aligning with enterprise web application development.

Airline Route Optimizer | *C++*

- Built an Airline Route Optimizer using graph algorithms for multi-city routing and meeting point solutions.
- Designed efficient graph structures with BFS-based pathfinding for optimized airline route discovery.

Bank Account Management System | *C++*

- Developed a console-based Bank Account Management System with core operations (open, deposit, withdraw, report), applying OOP principles for robust and modular design.
- Implemented a singly linked list and custom Account class with constructors, destructors, and operator overloading to enable scalability, efficient memory management, and data integrity.

Leadership & Activities

Nepalese Student Association | *UNT*

January 2025 - Present

Undergraduate Representative

- Supporting Nepalese undergraduate students—international and domestic—by assisting with onboarding, organizing support sessions, and helping with academic, social, and transitional challenges.
